VALENTINE NYANCHAMA MONG'ARE

Graduate Engineer – Civil / Structural Engineering

Citizenship: Kenyan
Location: Kenya
Telephone: +254 715 425 168
Email: jerotichmongare@gmail.com
LinkedIn: https://www.linkedin.com/in/valentine-nyanchama

ACADEMIC QUALIFICATIONS

Bachelor of Technology in Civil Engineering (Honors), Jain University, Bangalore, India, 2021–2025
Grade: Outstanding

Relevant Technical Areas

- Civil and structural engineering design
- Structural analysis and building design
- Feasibility studies and technical reporting
- Revit / BIM-based design coordination
- Technical drawings and design development

EMPLOYMENT RECORD RELEVANT TO THE ASSIGNMENT

Period	Employer / Position	Country	Summary of Activities
Oct 2025 – Present	Design Masters Studio Ltd – Graduate Engineer	Kenya	Supporting multidisciplinary building and infrastructure projects; conceptual and schematic design development; structural design and analysis; preparation of technical reports and design documentation; coordination with architects, engineers, consultants and clients; site inspections and monitoring; development of engineering solutions and technical inputs for feasibility and design assignments.
Sept 2023 – Sept 2025	Kayne Ventures Ltd – Cost Valuer	Kenya	Cost estimation, budget monitoring, preparation of tender documentation, measurement and construction-related technical support.

RELEVANT PROJECT EXPERIENCE

1. BAOBAB BEACH RESORT

Location: Diani, Kenya
Client: Baobab Beach Resort
Employer: Design Masters Studio Ltd
Sector: Hospitality / Resort Development
Role: Graduate Engineer – Structural Design Support

Relevant Experience

- Participated in the structural design development of resort facilities and associated improvements.
- Supported development and coordination of design information for engineering requirements.
- Contributed technical inputs during design development and coordination of project information.
- Assisted with preparation and review of drawings and technical documentation.

- Supported coordination between architectural, structural and other specialist design requirements.
- Contributed to the integration of functional, structural and sustainability considerations within the resort development.
- Assisted in translating design concepts into coordinated technical information suitable for further development and implementation.

2. BERBERA FISHING JETTY IMPROVEMENT FEASIBILITY STUDY

Location: Berbera, Somaliland
Client: FAO Somalia
Period: 2025
Sector: Fisheries Infrastructure / Coastal Development
Role: Junior Project coordinator

Relevant Experience

- Participated in the feasibility assessment and technical development of improvements to the existing fishing jetty and fish-landing facilities.
- Supported assessment of existing infrastructure and site conditions.
- Contributed to multidisciplinary analysis of proposed improvements to fishing and landing facilities.
- Assisted with development and review of preliminary design options.
- Supported preparation of technical documentation and feasibility-study outputs.
- Contributed engineering inputs relating to functionality, infrastructure requirements and future expansion.
- Participated in multidisciplinary coordination involving architectural, engineering, environmental and stakeholder considerations.
- Supported the development of practical infrastructure solutions responsive to the operational requirements of the fishing community.

3. RESIDENTIAL HOUSE – KILELESHWA

Location: Kileleshwa, Nairobi, Kenya
Employer: Design Masters Studio Ltd
Sector: Residential Development
Role: Graduate Engineer – Structural / Design Support

Relevant Experience

- Participated in the design development of a residential building.
- Supported structural design and analysis of building elements.
- Assisted in development and coordination of structural and architectural design information.
- Reviewed structural requirements in relation to the architectural configuration.
- Contributed to preparation and coordination of technical drawings.
- Supported multidisciplinary coordination during design development.
- Assisted with technical evaluation of construction requirements and design solutions.
- Contributed to the development of practical and buildable residential design solutions.

4. BARBADOS FISHERIES COMPLEX / BERINDA COX FISHING COMPLEX

Location: Oistins, Barbados

Project time: Ongoing
Employer: Design Masters Studio Ltd
Sector: Fisheries Infrastructure / Coastal and Marine Development
Role: Graduate Engineer – Multidisciplinary Design and Technical Assessment

Relevant Experience

- Participated in the assessment and conceptual planning of improvements to the existing fishing complex.
- Supported preparation of the inception and technical assessment requirements for the assignment.
- Contributed to assessment of existing civil, structural and infrastructure conditions.
- Supported development of engineering considerations for fishing operations, market functions and supporting facilities.
- Contributed to assessment of weighbridge services, waste management and disposal, water treatment/desalination, and main power supply systems.
- Supported consideration of renewable energy and hybrid power solutions for the facility.
- Contributed to environmental and social safeguard considerations relevant to the fisheries development.
- Supported assessment of marine and coastal considerations affecting the proposed development.
- Participated in multidisciplinary coordination covering civil/structural engineering, fisheries and market analysis, architectural and functional design, coastal and marine engineering, mechanical sustainability systems, and electrical/sustainability systems.
- Assisted in developing technical inputs for stakeholder engagement, site assessment and conceptual design.
- Supported preparation of technical presentation and reporting material for the assignment.

KEY TECHNICAL COMPETENCIES

Area	Relevant Experience
Civil & Structural Engineering	Structural analysis, building design, structural coordination and technical assessment
Multidisciplinary Design	Coordination of architectural, structural, civil and specialist engineering requirements
Feasibility Studies	Technical assessment, option development, infrastructure assessment and feasibility reporting
Fisheries Infrastructure	Fishing facilities, landing areas, fish markets, supporting infrastructure and operational planning
Coastal & Marine Infrastructure	Fishing jetty and coastal fisheries facility assessment
Sustainable Design	Renewable energy, water treatment, waste management and resource-efficiency considerations
BIM / Digital Design	Revit-based design development and multidisciplinary coordination
Technical Documentation	Drawings, reports, schedules, technical presentations and tender/design documentation
Site Assessment	Site inspections, existing-condition assessment and construction/design coordination
Project Coordination	Coordination with clients, architects, engineers, consultants and other project stakeholders

SOFTWARE & TECHNICAL TOOLS

- Autodesk Revit
- Autodesk AutoCAD
- Autodesk Robot Structural Analysis
- Prokon
- Microsoft Office Suite
- Primavera P6

PROFESSIONAL EXPERIENCE SUMMARY

Valentine Nyanchama Mong’are is a Civil Engineering graduate and Graduate Engineer with Design Masters Studio Ltd, with experience supporting multidisciplinary building, residential, hospitality and fisheries-infrastructure assignments. My project exposure includes the Baobab Beach Resort in Diani, Berbera Fishing Jetty Improvement Feasibility Study in Somaliland, a residential development in Kileleshwa, Nairobi, and the Berinda Cox Fishing Complex in Oistins, Barbados.

My experience covers civil and structural engineering, feasibility studies, technical assessment, multidisciplinary design coordination, sustainable infrastructure systems, technical documentation and site assessment. My current role involves supporting the development of design solutions from conceptual and schematic stages through technical documentation and coordination.
